Subject: Request for Expedited Review of Waukegan Generating Station Significant Modification
Date: Thursday, June 09, 2016 4:27:56 PM

Hi Ray – Genevieve asked that this message be sent as she is on work-related travel and is unable to access email this afternoon. Jennifer Darrow

Ray,

In the interest of providing for expeditious issuance of an effective Title V permit for the Waukegan Power Station, and consistent with our Memorandum of Agreement, EPA waives the remainder of the 45-day review period for the proposed CAAPP permit. As acknowledged by your email below, EPA raised a number of concerns regarding the Waukegan Power Station draft permit. We are granting this waiver, although these concerns have not been satisfactorily addressed. As discussed previously, EPA retains full authority to address these concerns in the context of the permit reopening.

Thanks.

Genevieve Damico
Chief
Air Permits Section

Any chance of getting this waiver so we can put on the 06/16/16 IPCB Board Meeting agenda, whereby we can issue the permit on 06/16/16. Deadline to put on the IPCB board meeting is 12:00 PM on 06/09/16. Otherwise, this will not be issued until the 07/07/16 Board Meeting.

Thanks.

Ray

Subject: Request for Expedited Review of Waukegan Generating Station Significant Modification

The Waukegan Station CAAPP permit was posted for USEPA 45 day review as shown below. The Illinois EPA in accordance with Provision VIII.(B) of the Memorandum of Agreement for Implementation of the CAAPP program is requesting an expedited review.

The Illinois EPA is available to discuss any concerns the USEPA may have in order to efficiently and timely issue this CAAPP permit.

If the USEPA has no objection to the permit, the Illinois EPA respectfully requests that the USEPA notify us of when USEPA has waived the rest of the 45 day review period such that we may proceed to obtain Pollution Control Board authorization to issue at the earliest scheduled IPCB meeting.

Waukegan Station
ID #: 097190AAC
Permit #: 95090047
45 day USEPA review Start date - 5/18/2016
45 day USEPA review End date - 7/2/2016

If you have any questions, please give me a call.

Thanks.

Note: By way of background, the permit and statement of basis have been previously shared with USEPA for preliminary review before public notice started and before the formal USEPA 45 day review period started, the USEPA commented prior to and during the public notice period and Illinois EPA responded appropriately to those comments in the responsiveness summary.

Additionally, the draft responsiveness summary was previously shared with USEPA for preliminary review before this formal USEPA 45 day review period started and extensive discussions regarding comments on both the permit and draft responsiveness summary were discussed.
